

Compacta Compacta

Compact cartoning machine

A new, efficient solution for screw packaging. The machine combines box forming, feeding and closing in one compact structure of just 2000x2000 mm overall dimensions. The system features a production rate up to 7 boxes/min. (Box dimensions: Min. 100x100x50 mm Max. 300x200x200 mm) and can be fed by a counting or weighing system or other types of feeding units.

Box Dimension

Min. 100 x 100 x 50 mm
Max. 300 x 200 x 200 mm

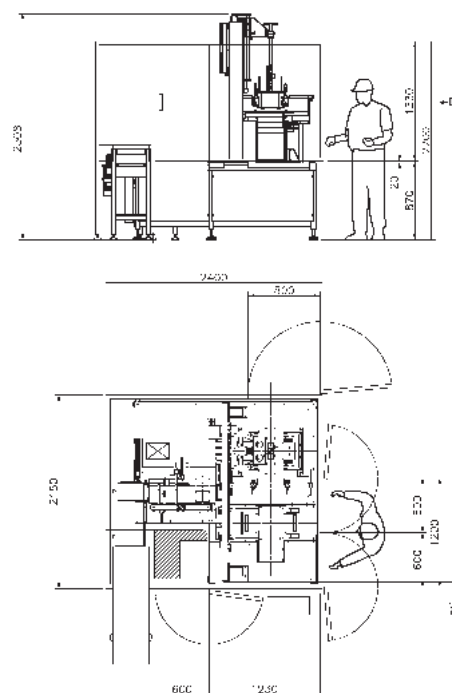

Production speed

Up to 7 boxes / minute

Features and Performances

- Adjustable vertical carton magazine to keep top of the pile always at the same position;
- Horizontal and vertical pneumatic axis to collect the single cartons and transfer them to the forming head and glue application station;
- Pneumatic drive of the box from the forming head;
- Motorized chain drive under the forming head and at the product feeding station;
- Pneumatic cylinder for the transfer of the full box to the closing unit :
 - 1) Closing of the lateral flaps by rotary pneumatic cylinders;
 - 2) Motorized chain drive for lid closing and gluing (adjustable for different box sizes, using always the same glue spray);
- Safety guarding;
- Installed power: 13 KW;
- Electric requirements: 400 Volt, three phase - 50 Hz + PE;
- Paint: RAL 9002;
- Machine conforms to the CE regulations.
