

## Converpack

This flexible and high performing solution combines single cross fold converting with four-side-seal flow-wrapping.

### Converting unit

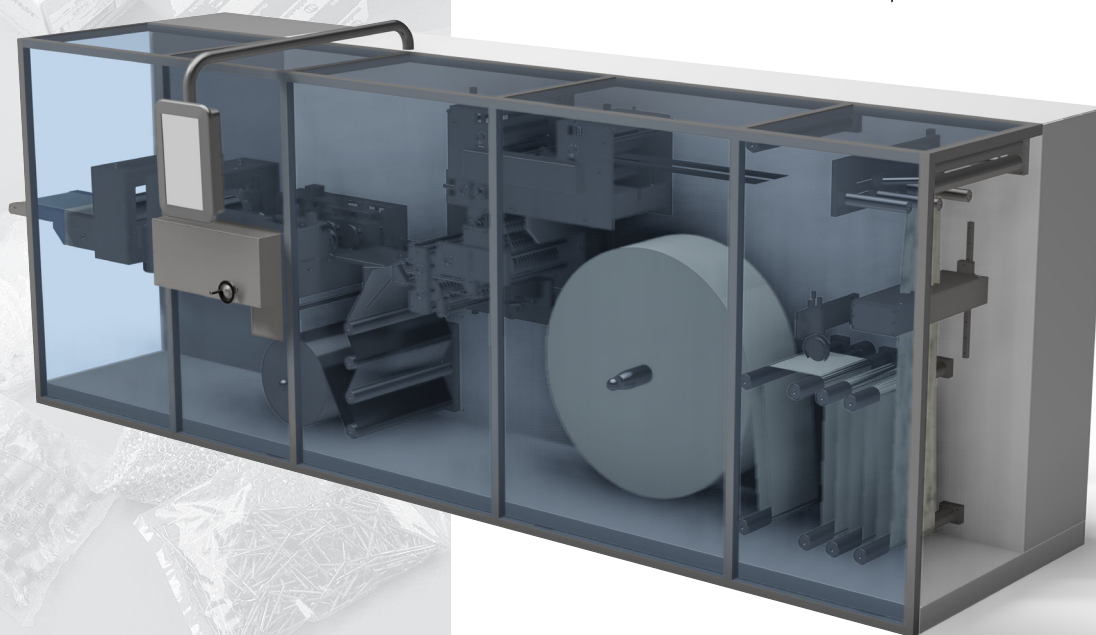

- Rotary cutting system to slit tissue longitudinally;
- Tissue tension control;
- Tissue reel holder with pneumatic block; max reel diam. 1000 mm, max reel width: 600 mm;
- Accordion folding unit: interchangeable longitudinal folding device;
- Cross folding blade device;

### Soaking system

- Two individual soaking tanks equipped with doser pump and liquid level control;
- Two couple of squeezing cylinder for adjustable pressure of tissue, for tissue feeding into the soaking tanks and for removal of excess liquid at exit;
- Wipes cutting unit with adjustable knife;
- Belts unit for wipes transfer on the lower film of the packaging machine.

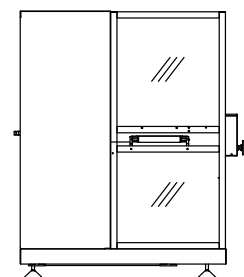

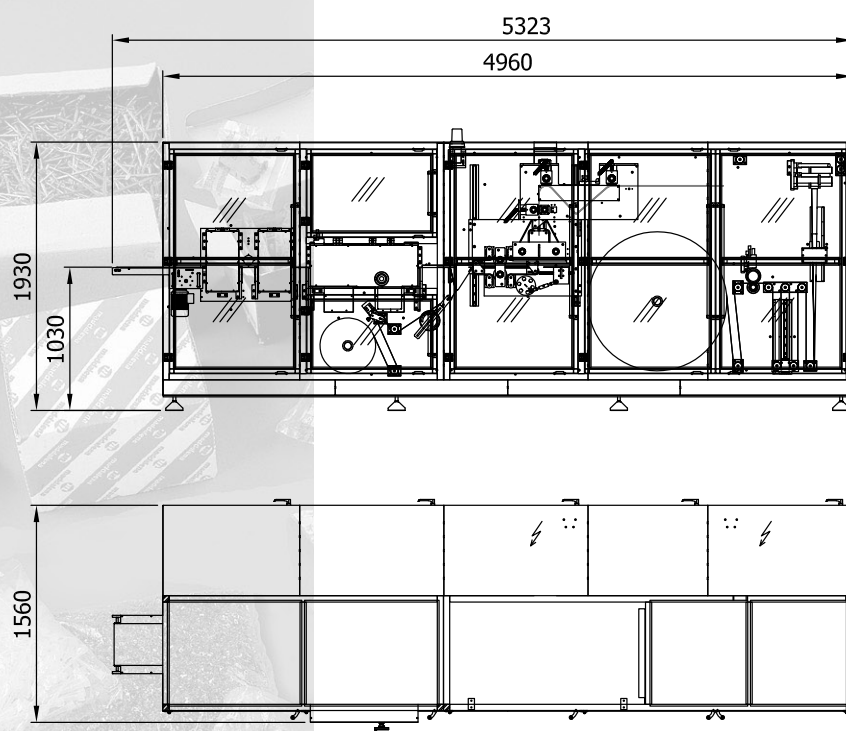

### Flow-wrapper

- Single lower reel-holder unit, with pneumatic block;
- Longitudinal sealing unit adjustable in width with 3 units of feeding wheels and film sealing;
- Rotating sealing jaws unit;
- Outfeed belt for finished products.

## TECHNICAL SPECIFICATIONS

- Max wipe dimensions: 300x250 mm (width x length);
- Final dimensions of folded wipe: max 100x125 mm;
- Min wipe dimensions: 150x100 mm;
- Final dimensions of folded wipe: 50x50 mm;
- Running speed: up to 600 sachets/min on twin lane depending on type of nonwovens to be packed and on wrapping film;
- Rockwell PLC;
- 11 Motor motion control;
- Power: 18,2 Kw installed / 33A / 400 Volt, 50 Hz-60 Hz.
