*Integrated
Inspection*

*20% More
Sealing Power*

*Unique
Sealing Head Designs*

*Optimal
Control*

Unprecedented power & control

More productivity, easier setup and more control.
And that's only the beginning...

Up to 20% More Sealing Power For Many Applications

All New Cap Inspection System

- Sets up in minutes: pre-programmed and fully integrated with sealer
- Touch Screen control for inspection and rejection
- High sensitivity and responsiveness
- Portable design for maximum versatility
- LED bottle centering guide

Internal Intelligence

- Easy to use and intuitive touch screen design
- Supervisory password protection with operator lockout
- Recipe management
- Internal monitoring of all critical operating data
- Container, cap, and foil counters
- Descriptive fault information
- Multiple language selection

Control Options

- Local and remote start/stop controls
- Local and remote power controls
- Remote network control and monitoring via RS485 or ethernet

And that's not all!

- Stainless steel enclosure
- Microprocessor control
- Universal input voltage compatibility (200V through 240V)
- Advanced self-protective circuitry for electrical components
- Compatible with Enercon's current high efficiency patented sealing heads
