

Servoflex

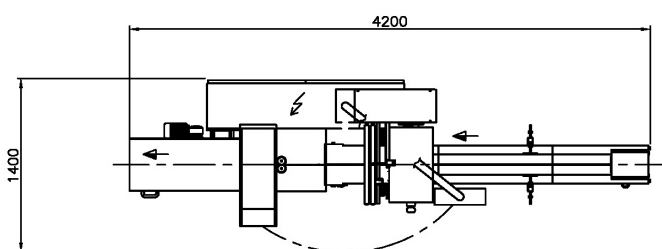

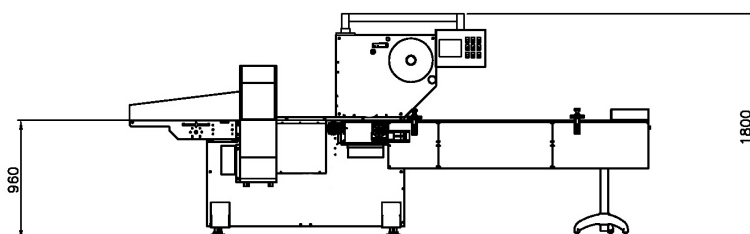

Horizontal Flow-wrapper

The Servoflex is a heavy duty flow wrapper designed with quality and reliability in mind. It can sustain multiple shift operation but it also easily manages smaller and simpler tasks. This flow wrapper is ideal for medium to large sized operations where the flexibility of servo motors together with the strength and quality of its construction will help to improve your productivity and your bottom line.

Technical Specifications

- Conveyor belt with pushers for product's feeding 2500 mm long and 300 mm wide with stainless steel top;
- Pushers for product's feeding with quick extraction in food plastic material;
